

HotSeat

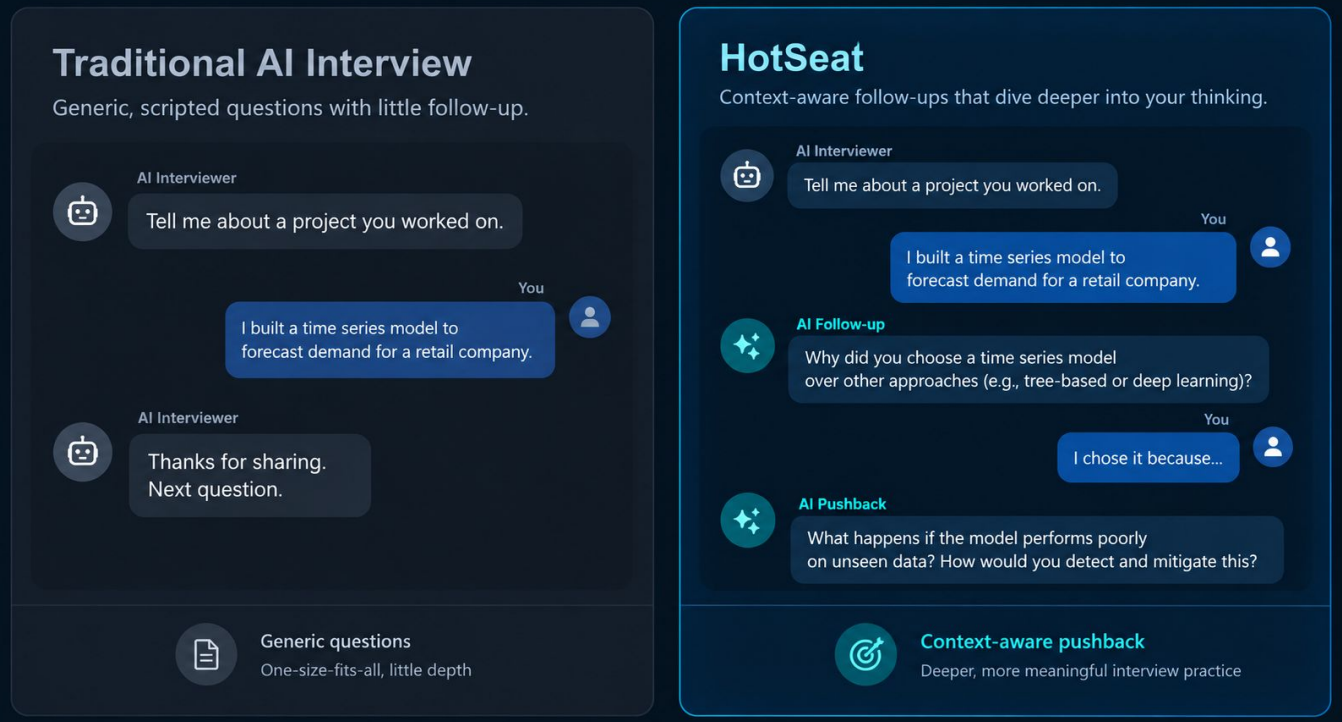

Take the hot seat before the real one.

An AI interview panel that asks about a project you built.

Boson AI × MScAC Higgs Audio Hackathon 2026

How we stand out

3 interviewers

100+ voices

8 languages

2–15 minutes

1

Ask meaningful follow-ups

Make sure you are familiar enough with your projects and improve with our product.

2

Smooth transition

Time buyer, low latency

3

Immersive experience

With a wide selection of avatar and voice, immerse yourself with your selected interviewers.

4

Professional report

After the mock interview, we'll generate a professional feedback for you, with scores, interviewers feedbacks, and how to improve.

HotSeat: a live interview panel

1

A panel, not a chatbot

A host, a technical lead and a mentor, each with their own voice. The two interviewers also have a face.

2

You talk, they listen

Each question is about what you just said.

3

A report at the end

Scores, a résumé check and things to practise.

minutes

How it works: one loop

Higgs Realtime hosts the opening and fills the first video-preparation gap.

Prepared while you answer

While you answer, we prepare the next question and video. An LLM confirms your turn has ended before playback.

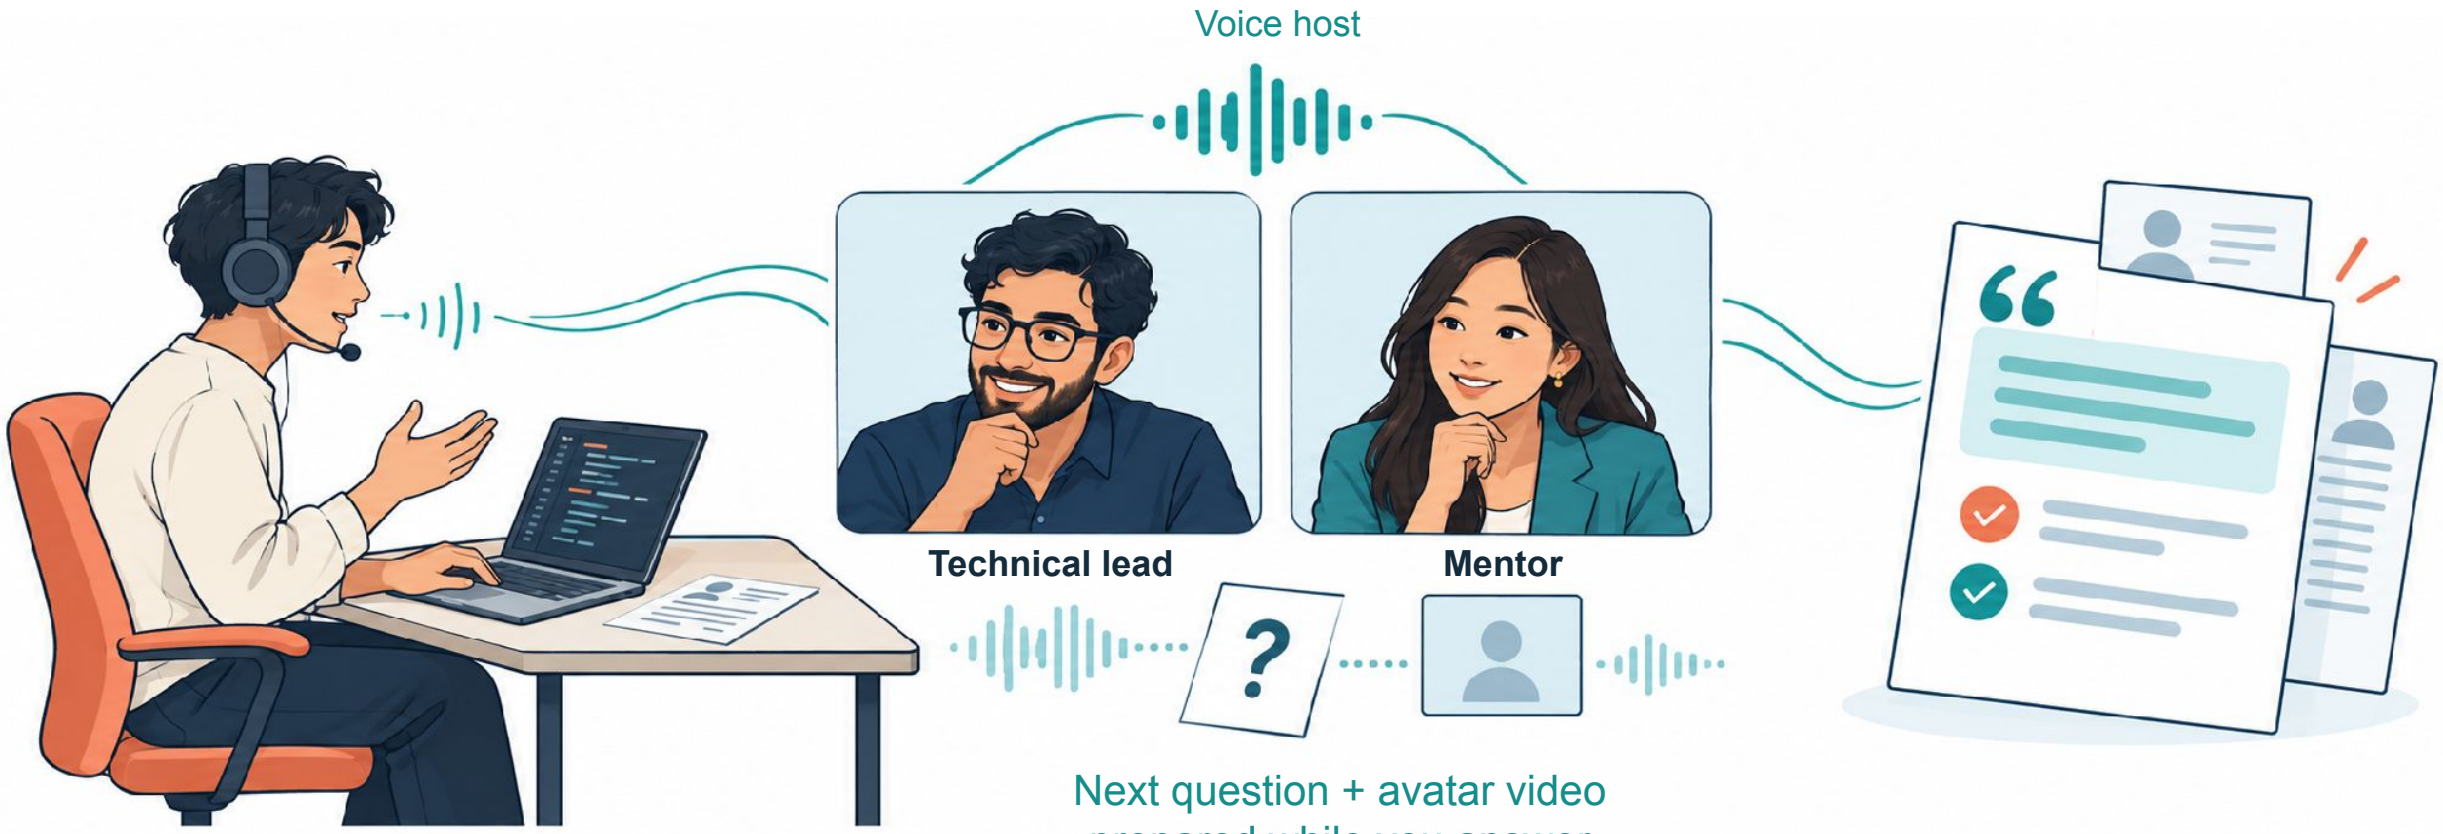

When time is up: Report with scores, quoted evidence and a résumé check

HotSeat

An AI interview panel for
the projects you built

"Here's what I built…"

"Why did you build it this way?"

(a) Your project

Speak about what you built

(b) Adaptive follow-ups

Questions build on your last answer

(c) Grounded feedback

Quoted evidence + résumé check

Idea 1 · One panel, three Higgs models

Session host
Higgs Realtime

Opens the interview, answers your questions and keeps the conversation moving.

Interviewer voices
Higgs TTS 3

Distinct voices and tones for the technical lead and mentor.

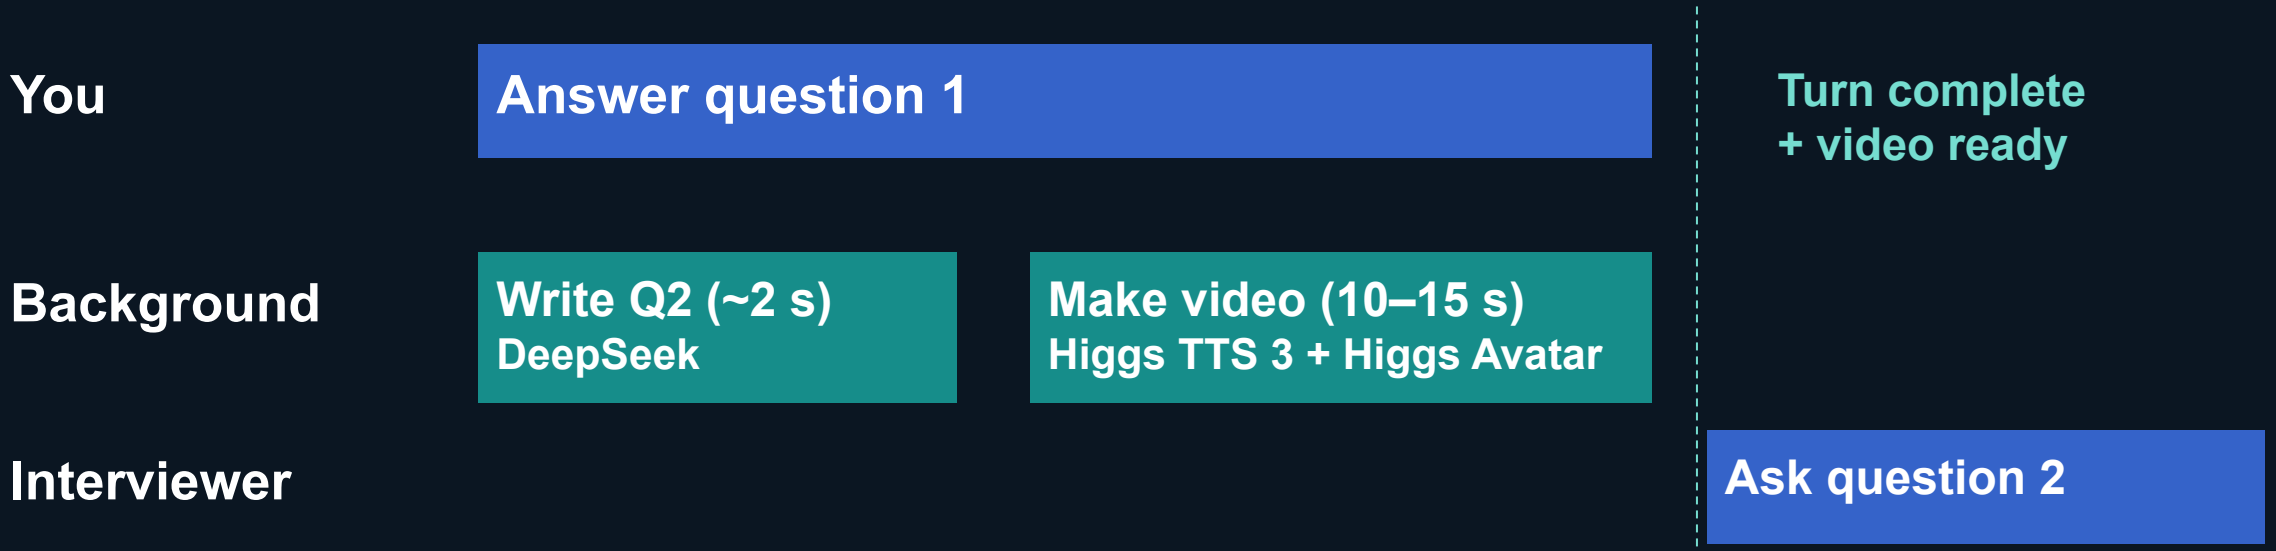

Talking avatars
Higgs Avatar

Brings the technical lead and mentor on screen as talking avatars.

100+
voices

8
languages

Idea 2 · No awkward silence

Illustrative timing, not to scale

The host fills the gap
Higgs Realtime

After your introduction, a short question covers the first video's preparation time.

The panel waits for you
LLM turn check

A pause does not end your turn.
Repeat, explain, skip or interrupt.

Idea 3 · Built on what you said

Adaptive follow-ups
No fixed question list

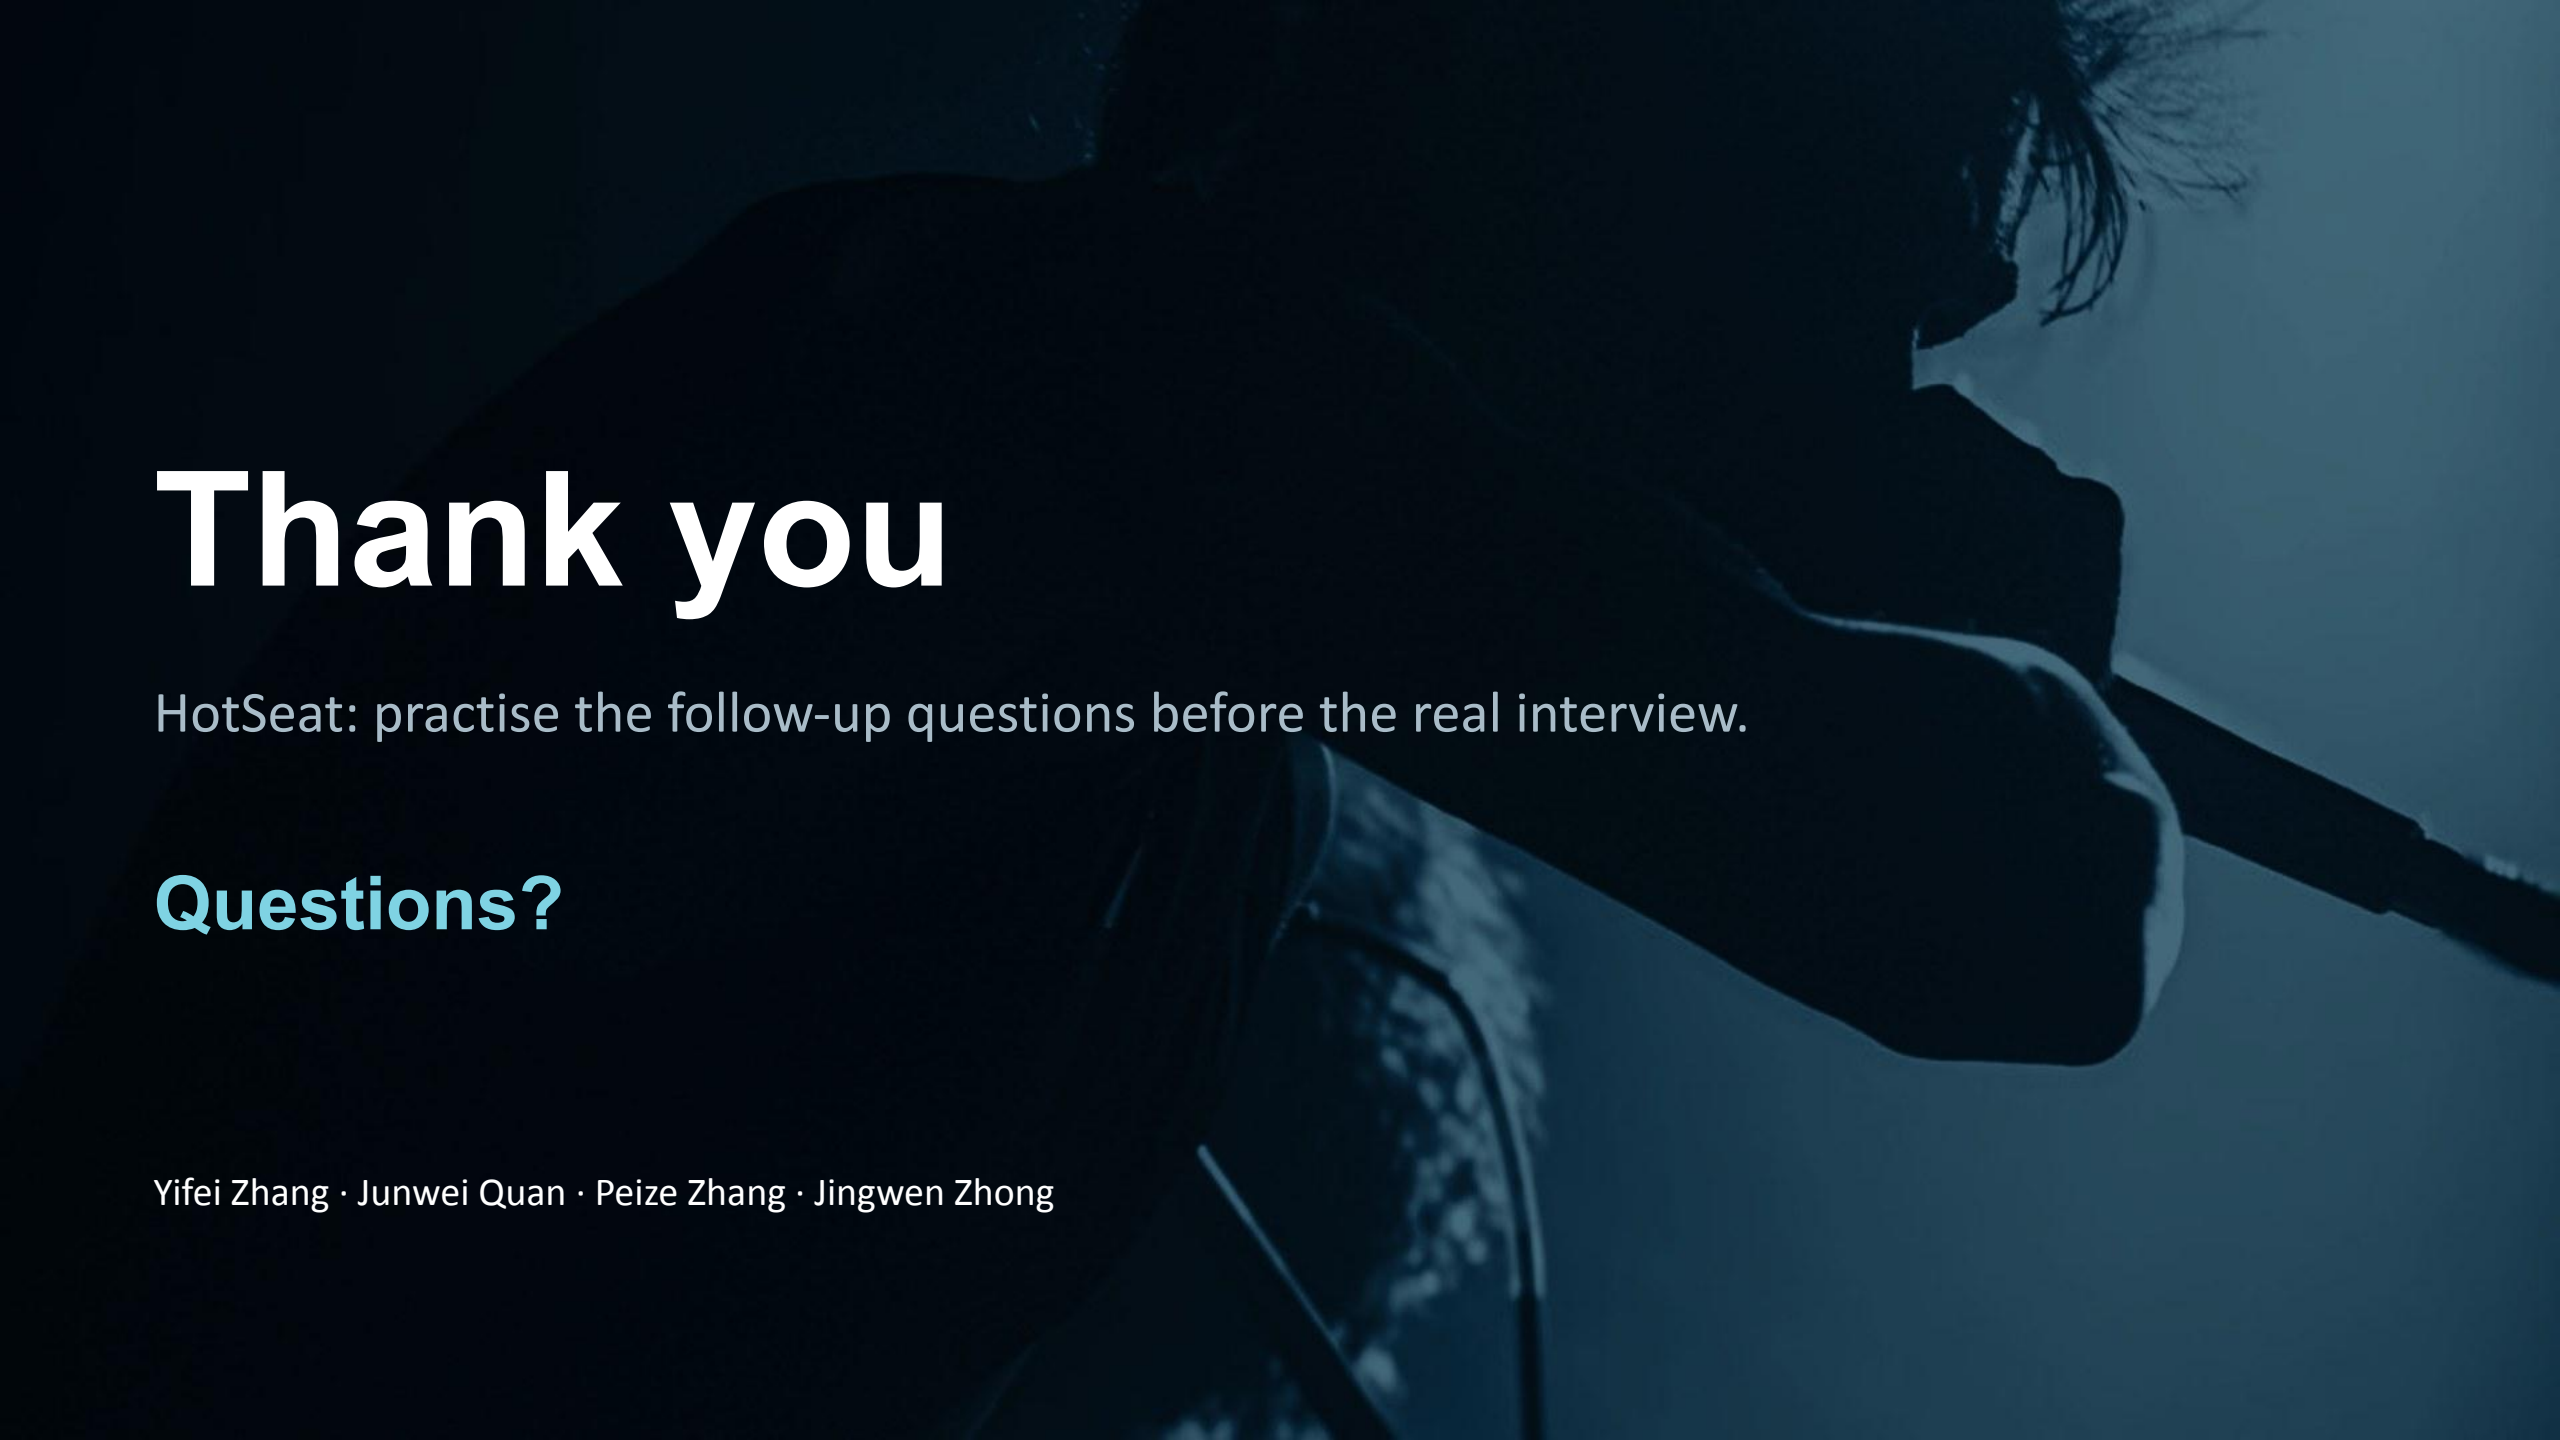

Each question builds on your last answer. We catch repeated questions.

Evidence for each score
Your own words

Each score cites your words. We check quotes against what you actually said.

Résumé check
Résumé + answers

We compare your résumé with your interview answers.

Thank you

HotSeat: practise the follow-up questions before the real interview.
